***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Moutafis et al. (US Patent No. 5,333,620).

**Claim 8:**

Moutafis teaches a method for manufacturing a guidewire (figure 2) having a core (52) of a first metallic material (col. 5, lines 3-7); forming the coil (60) of a second metallic material (col. 5, lines 10-13) different than the first metallic material; and mechanically interlocking the coil and the core (at 67).

**Claim 11:**

Moutafis teaches providing the coil (60) with a convolution forming a bridge (proximal to reference 67); and during the mechanical interlocking step, bending the core over the bridge (figure 2).

**Claim 12:**

Moutafis teaches that the core is bent around the coil in at least one revolution (figure 2).

Claim 13:

Moutafis teaches that the core is attached to itself (col. 5, lines 17-20).
